

Press Release

iTaskX 3 - It's done!

Steyregg, Austria - 18th January, 2016

Over 10 years experience and 3 years in the making, iTaskX 3 redefines professional project management software for Mac.

Techno-Grafik is delighted to announce that its its hotly- anticipated, Microsoft Project compatible, professional project management software, iTaskX 3, is now available. The whole ethos around iTaskX 3 is producing incredibly fast, sophisticated tools that are focused to provide the best available workflow for project managers, architects, business analysts and project contributors from any industry. We mixed 10 years customer feedback and programming experience to rebuild iTaskX from scratch to take advantage of the latest and greatest OS X APIs.

iTaskX's new user interface inspired by OS X 10.11 El Capitan feels entirely fresh and also includes capabilities previously found only in more expensive project management suites. Among them are:

- **Graph areas und new Usage views** - Using this features/views, managers can effectively manage employee workloads and assign resources as new business arrives and tasks are completed, ensuring that team members are working at their optimized levels.
- **Cost Rate Tables** - This feature provides multiple cost rates for a resource in the same project. iTaskX provides up to five rates for each resource.
- **Recurring Tasks** - If you have a task that will happen every couple of days or every month - any regular schedule, really - iTaskX can create it as a recurring task, so you only have to set it up once.
- **Advanced Work Calendars** - Integrated project, task, base, and resource work calendar system to efficiently schedule tasks, team members and account for exceptions such as holidays or non-standard work schedules.
- **Effort-Driven Scheduling** - Provides a compression technique that enables managers to reduce task durations as resources are assigned to tasks and create what-if scenarios to determine what it will take to complete the project sooner.
- **Import, Export, Exchange** - Import, Export or copy task or resource lists from other applications (Numbers, Excel, Project...), exchange projects with industrial standard formats like XML, share appointments with the OS X Calendar app, direkt link to the OS X Contacts to add resources with all their contact details - a lot of useful features to save time.
- **Other new features** in this new iTaskX release include: Microsoft Project 2016 support, new template system, styles for all visible elements, screen zoom, sort for task and resources, custom columns, up to 10 baselines, new print features, Earned value analysis...
